Raka Satya Wurya Andhika

Undergraduate Informatics
Student at Universitas
Multimedia Nusantara

Kota Tangerang Selatan, Banten,
Indonesia

About Me

A student who is eager to learn new things, willing to take on challenges, and responsible in completing assigned tasks. Currently, I am deepening my knowledge in the field of Computer Science through university studies and online courses. In my studies in Computer Science, I am particularly interested in UI/UX Design and Web Development. I have a talent for Web Development, with analytical skills, creativity in designing interfaces, and an understanding of modern web technologies. I have experience in designing responsive and functional web solutions, both individually and as part of a professional team.

Projects

HidGems Indo • Frontend Web Developer

April 2023 - June 2023

Hidgems Indo is a website containing recommendations for Indonesian tourism that has not been touched or popular among domestic and foreign tourists.

- Designed and developed all parts of the website, especially on the frontend.
- Displays 11 tourist attractions that many people do not widely know.
- Build with a responsive interface to optimize for many devices.
- Technologies Used: HTML, CSS, JavaScript, ReactJS.

Cendrawasih School • Frontend Web Developer

October 2023 - December 2023

Cendrawasih School is a school website that is used for various purposes, including managing donor data, beneficiaries, and activities

- A developed website by adding new features, bug fixes, security improvements, and a more modern and user-friendly UI (user interface).
- Adding photos and the school address on the website.
- Technologies Used: PHP, Laravel, MySQL.

E-Learning App • Fullstack Web Developer

April 2025 - Jun 2025

E-learning is a modern learning method based on digital technology that allows students to learn online without time and space limitations.

- Designed and developed the application and ran it on hybrid devices (Android and iOS).
- It used cloud databases and storage to save and manage data, courses, accounts, and photos.
- Technologies Used: React Native, Supabase.
