Raka Satya Wurya Andhika

 Kota Tangerang, Banten,
Indonesia

About Me

A fresh graduate in Informatics who is eager to learn new things, willing to take on challenges, and responsible in completing assigned tasks. I am particularly having a strong passion in UI/UX Design, Software Engineering and Web Development. Through both academic and personal projects, I have developed responsive and user-friendly web applications using React.js, Next.js and other modern web technologies. I am a responsible, disciplined, inquisitive and fast-learning individual who enjoys solving problems, collaborating in teams, and continuously learning new things. I am eager to apply my technical skills and contribute to developing creative software solutions while growing professionally in the IT industry.

Projects

HidGems Indo

April 2023 - June 2023

HidGems Indo is a website containing recommendations for Indonesian tourism that has not been touched or popular among domestic and foreign tourists.

- Designed and developed all parts of the website, especially on the frontend.
- Displays 11 tourist attractions that many people do not widely know.
- Build with a responsive interface to optimize for many devices.
- Technologies Used: HTML, CSS, JavaScript, ReactJS.

Cendrawasih School

October 2023 - December 2023

Cendrawasih School is a school website that is used for various purposes, including managing donor data, beneficiaries, and activities

- A developed website by adding new features, bug fixes, security improvements, and a more modern and user-friendly UI (user interface).
- Adding photos and the school address on the website.
- Technologies Used: PHP, Laravel, MySQL.

E-Learning App

April 2025 - Jun 2025

E-learning is a modern learning method based on digital technology that allows students to learn online without time and space limitations.

- Designed and developed the application and ran it on hybrid devices (Android and iOS).

- It used cloud databases and storage to save and manage data, courses, accounts, and photos.
- Technologies Used: React Native, Supabase.

Developing Baduy's Website

August 2025 - December 2025

Baduy's Website is a website to provide the general public with information on the life, culture, and traditional values upheld by the Baduy people. This website also serves as a platform for spreading information about traditional Baduy products that can be marketed and purchased by the wider community.

- Designed and developed the "Product Details page" and Content Management System Features (including "Article" and "Content" page).
- Fixed a lot of structural disorder, animations, design errors and "missing features" problems found on the existing pages such as "Product", "Home", and "About Us".
- Technologies Used: PHP, Laravel, MySQL.
